**Gravesend, Kent - October 11, 2005** – SD2001's Domain Promotions (<http://www.domain-promotions.co.uk>) is offering new improved Search Engine Optimisation services, from their newly set-up SEO department. The new "Promote" range of packages cover most areas of Search Engine Optimisation (SEO), and the service only offers techniques that conform to search engine rules.

The new "Promote" packages are aimed at the small businesses that have a lower budget to promote their websites and services. Although SD2001 has been providing a smaller selection of these services for the last 3 years, the new department now gives a dedicated service to all our clients. The "Promote" packages all cover one (1) year of service and provide weekly reporting and statistics so clients can keep track of the results. All the results can be accessed online via our secured area and are available as a PDF download.

"We are very pleased to have the new department open; this will enable us to expand the range of services available to all our clients, stated Anthony Marriott, Managing Director of SD2001.

Founded in 2001 with headquarters in Kent, England, SD2001 works with both the personal and business-to-business market. SD2001 offers a wide range of Internet solutions, including high-speed windows based web hosting, e-commerce solutions (including content photography), web design/programming services, search engine optimisation, machine translation and consultation services.

Additional information on Search Engine Optimisation can be found at <http://www.domain-promotions.co.uk>, by telephone +44 870 474 0161 or by emailing [info@domain-promotions.co.uk](mailto:info@domain-promotions.co.uk).
